KNOT BOARD

ROPES & KNOTS

PRESENTED BY :

INS SSEMWOGERERE EMMANUEL

CUC MASTER GUIDE KNOT BOARD

A ROPE

Is a large string twisted together.

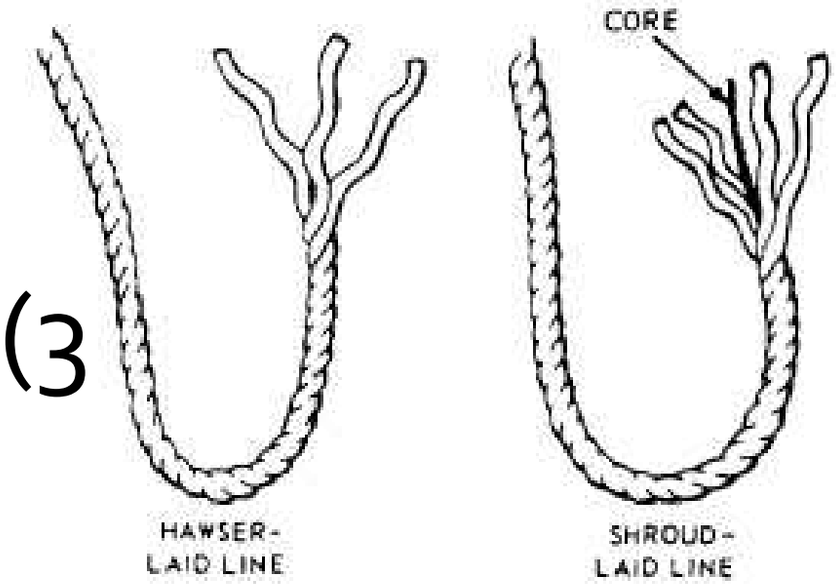

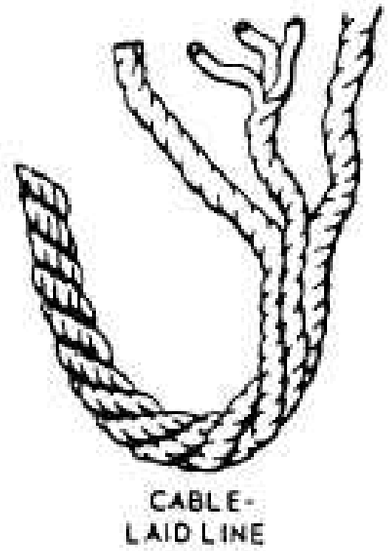

TYPES OF ROPES

-HAWSER LAID (3 STRAND)

-SHROUD LAID (4 STRAND)

- CABLE LAID (9 STRAND)

MATERIALS USED TO MAKE ROPES

1. Natural Materials
2. Synthetic Materials
3. Metallic Materials

NATURAL MATERIALS

a). **MANILA** :- Ropes made from the leaves Of **MUSA TEXTILLIS TREE** in

b). **SISAL** :- Ropes made from the leaves Of **AGAVE SISALAUA PLANT**

c). **HEMP** :- Ropes made from **ANNUAL HERBACEOUS PLANT**

d). Cotton :- Ropes made from **white**

Downy fibrous substance that covers the Seeds of the cotton plant

e). **COIR** :- Ropes made from **COCONUT HUSKS**

SYNTHETIC MATERIALS

Synthetic ropes are all man made from Different types of **NYLON.** The main types synthetic ropes are as follows

a). **POLYPROPYLENE AND POLYETHYLENE**

a). POLYPROPYLENE AND POLYETHYLENE

These are ropes which;

a) Stay afloat and are not affected by water
b) Are designed for marine purposes
c) Are tough and have good abrasion resistance
d) Are low in stretch and heat resistance

b). POLYESTERS

These are nylon ropes which;

a) Are afloat and are not affected by water
b) Have high heat resistance and
c) Have low stretch factor

c). NYLON

These are ropes that;

a) Have a high level of strength
b) Are affected by wet conditions
c) Have good stretch factor and moderate heat resistance

CARING FOR THE ROPE: - DON'T'S

a) Do not walk on the rope or let dirt, sand get into the inside.
b) Do not drag the rope on the ground.
c) Do not store the rope wet.
d) Do not leave knots in the rope
e) Do not allow the ends of the rope to unravel, always tie a stopper knot.

PROPER STORAGE OF ROPES

a) The rope should always be stored in a cool dry shaded area. The rope should be coiled and secured by a stopper after usage.
b) The rope should be stored by hanging or by placing in a secured box.

KNOT

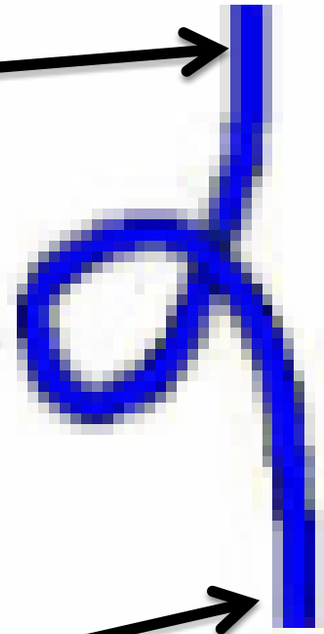

A knot is used to tie up a bundle or join the two ropes to make a loop or noose in the rope.

PARTS OF THE ROPE

STANDING PART

BIGHT

RUNNING END

TYPES OF KNOTS

BEND

This is used to tighten the ends of two large guy ropes together

e.g.

Josephine knot
(smaller Rope)

Carrick bend
(large Rope)

MASTER OF KNOTS

-

(i) Bite

(ii) Overhand

(iii)double overhand

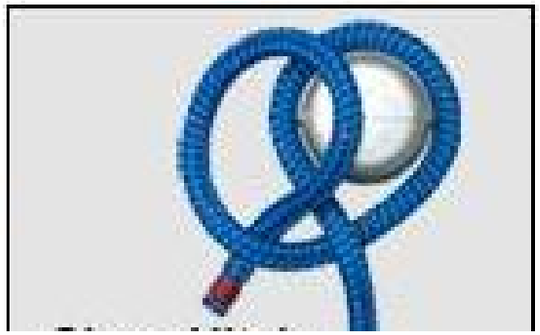

(iv) Surgeons knot

HITCH

This is used to tie a rope to a ring, spur, post and other material

e.g.

Clove hitch

Chain hitch

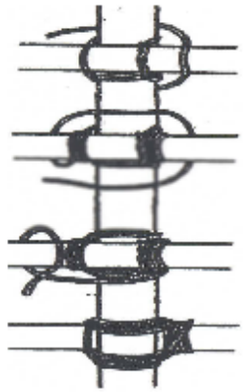

LASHING

This used to join two or more spur, posts and other material together

e.g.

Square lashing

Diagonal lashing

SPLICES

Permanent joining of the ropes

i.e. it is not for untying forever

LOOP

(i) Alpine butterfly

(ii)Bowline

(iii) figure 8 loop

(iv)hangman’s loop

(v)highway mans hitch

(vi)Handcuff knot.

STOPPER KNOTS

(i)Overhand

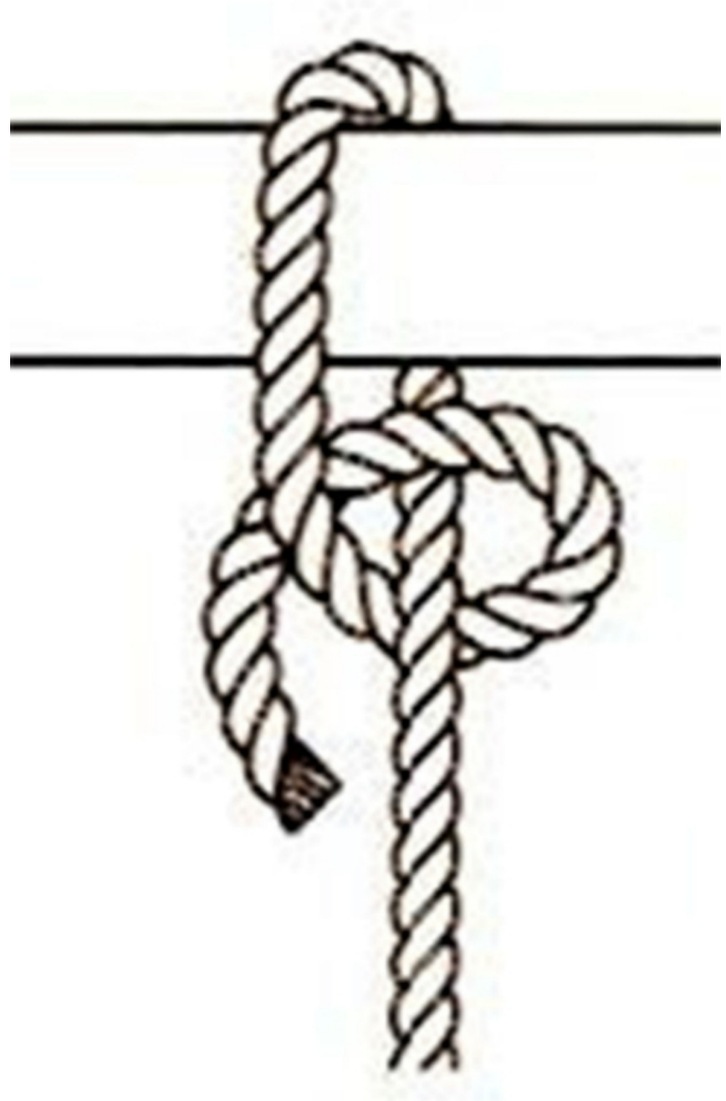

(ii) double overhand

(iii) surgeons knot

(iv) figure 8 knot

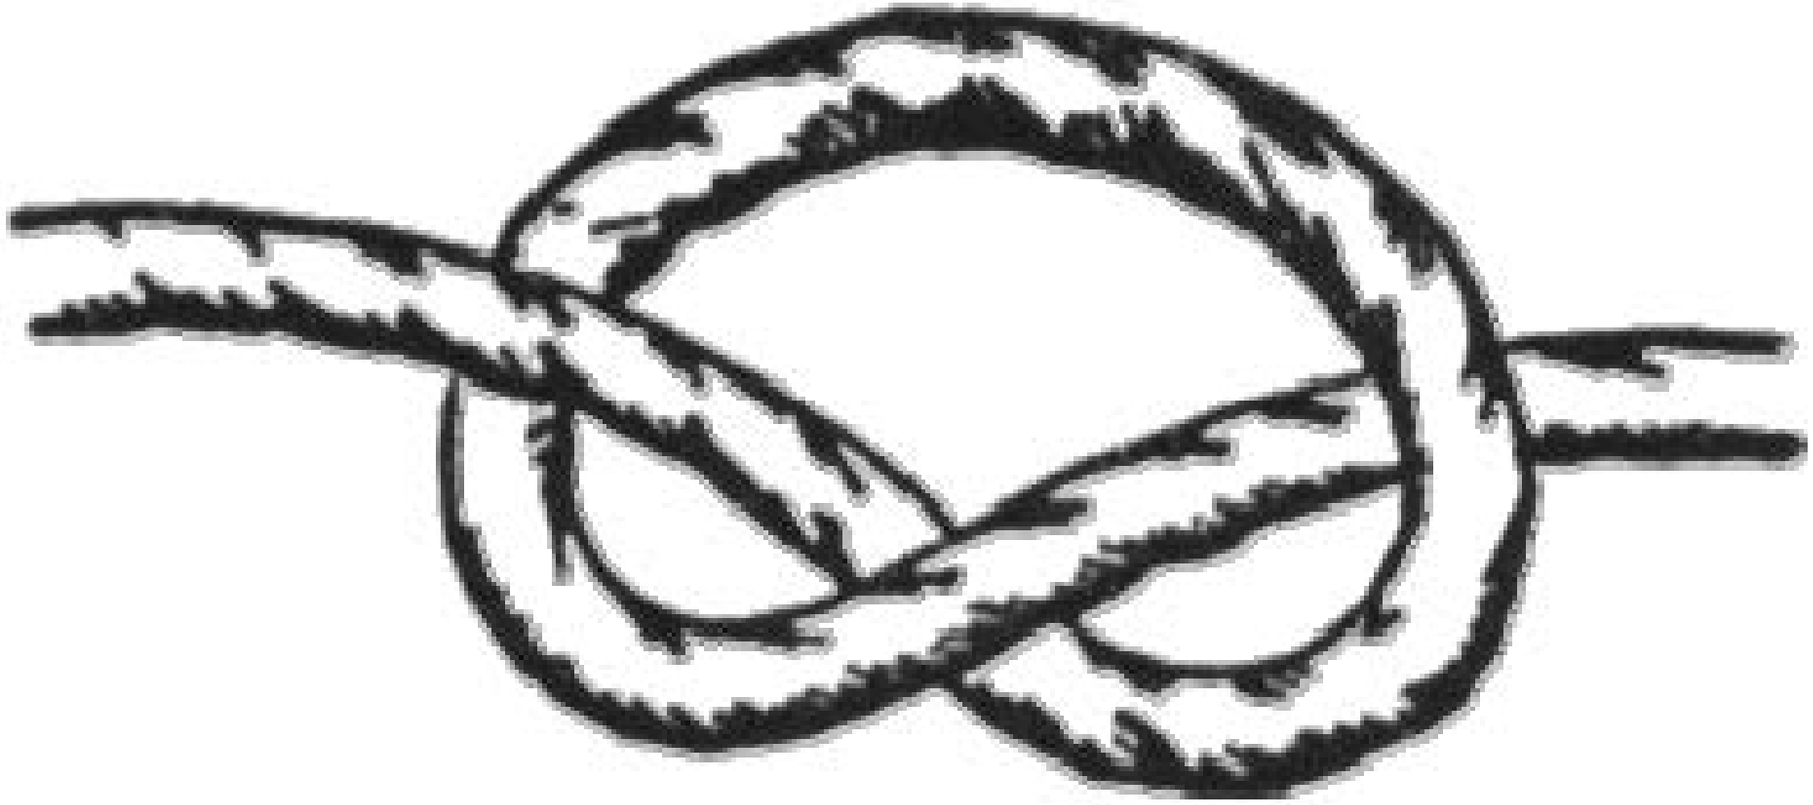

(v) stevedore
